

Guidelines for mentors at the NHRC

These guidelines have been formulated drawing on the comments and observations made by previous participants of the New Housing Researchers' Colloquium (NHRC), through the surveys conducted among them in the past years.

The purpose of these guidelines is to identify the key issues that the mentors are kindly requested to observe during the performance of the mentoring exercise.

1. Please provide the most helpful feedback to the mentees that will contribute to the optimum improvement of the quality of the paper presented.
2. Please provide the mentee with written feedback precisely specifying, especially, the issues that need to be further worked on in order to improve the quality of the paper/research.
3. Please suggest (if you can) additional literature sources for further reading that you find to be relevant and useful on the particular subject.

ACKNOWLEDGEMENT

The ENHR Coordination Committee recognizes and greatly appreciates the time devoted by the mentors to reviewing the NHRC papers and providing their knowledge and valuable advice to the new researchers in the effort to help them achieve the required academic standards.
